May 2026 Class Schedule

Beginning Spinning on a Wheel: This class will teach you to spin your first handspun yarn from start to finish!

Week 1: The best way to start spinning on a wheel is to get to know your equipment first. We will get to know your equipment, including wheel mechanics, adjustment, cleaning & maintenance. We will talk about how to choose a good seat to spin from and ergonomics to keep you spinning for years to come.

Week 2: We will discuss how to set up your wheel for each new spin, how to prepare your fibers for spinning, and drafting!

Week 3: The next step is to ply your yarn. We will cover how to make traditional 2-ply yarn, traditional 3-ply yarn, and chain-plied yarns. We will also talk about how to best prepare your singles for plying, why you need a lazy kate, and what to do if you *gasp* ply your yarn in the wrong direction.

Week 4: "It's not finished until it's WET FINISHED." What is wet finishing? Why is it important? What is fulling - is that another word for felting? What is "thwacking"? How does one do it? We will answer all those questions and more! We will wet finish the yarn you spun & plied for homework.

Pre-requisites: Skill level: all! This class will be helpful for total beginners, to those returning to spinning after a hiatus, to those who just want to deepen their skill set!

Wheels must be assembled and in working order (things that should move do and things that shouldn't move don't; drive bands, brake bands, footmen intact, all parts present, including flyer and bobbin).

If you're unsure if your wheel is in working order,

please schedule a Spin Doctor Wheel Evaluation before class.
